

Process compliance document - EMP080

Author: Skyler Chen | Role: Engineer | Dept: Engineering

Location: Hsinchu | Date: 2025-03-24

This document describes the engineering process compliance requirements for software development. All code changes must be peer-reviewed before merging to the main branch. Security scans (SAST/DAST) are mandatory for any service handling PII. Architecture decision records (ADRs) are maintained in the repository wiki.
