

Process compliance document - EMP049

Author: Drew Kim | Role: Architect | Dept: Manufacturing

Location: Portland | Date: 2025-02-21

This document outlines the manufacturing process compliance requirements for the current quarter. All personnel are required to follow ISO 9001:2015 procedures when operating equipment on the production floor. Deviation reports must be logged within 24 hours of occurrence. Equipment calibration logs are reviewed bi-weekly by the quality assurance team.
